

WIRELESS CALLING System

SR-300F

Syscall

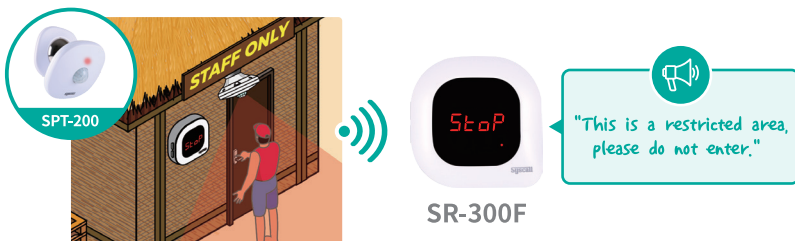

01 Restaurant

....

Customers sitting at an outdoor table can easily call the staff by simply pressing the call button. Once they press the button, the table number will be displayed on the mini display monitor installed near the reception desk and/or on the staff pager on the move.

02 Restricted Area

....

When the motion detector detects a stranger's approach at the restricted area, it will send the signal to the mini display monitor. This monitor is able to output the warning voice message, so the person who accidentally comes in can quickly notice that this is the restricted area.

03 Bar

....

If there are several cash registers and customers stand in one line, the customers can be informed which counter is available by Syscall mini monitor. Staff will press the call button when ready to serve the next customer, the counter number will be displayed with the sound "Next, please".
